Camp Selections

Wacky Weather - 9/29
Discover the science behind our wild, wacky, weather! Become a meteorologist and study what's so cool about wind, air pressure, temperature and humidity. Set free a thunderstorm, find the perfect ingredients for a hurricane and even create your own weather measurement tool!

Spooky Science - 10/17
Have a spooktacular time as you discover the science behind the strange and even meet some real live creepy critters! Write secret messages that disappear before your eyes and create batches of ooey gooey slime. Uncover the secrets of mystical dry ice and find out a few science tricks to some spooky ideas!

Go Green - 11/23 & 25
Join this enviro-tour through the earth! See if you have a green thumb, Discover Biofuels, Learn the 3 R's of Recycling, Create recycled works of art and botanical prints, Explore green technologies and power sources, Build and Experiment with alternatively powered vehicles and contraptions… Do you have what it takes to Go Green?

Aquatic Adventures - 12/22-23
Dive right into marine biology as you meet some super sea creatures! Become masters of the reef as you uncover the secrets of the ocean. Experiment with the science of sand, get wild with waves and discover all of the interesting critters that live in the sea! Be prepared to jump in and get fishy and by the end of the week, the stingrays will be eating out of the palm of your hand!

Kitchen Chemistry - 12/26-30
Combine a pinch of science and a dash of fun to concoct some super substances! Conduct fun experiments that you can actually eat! Become a kitchen chemist and learn how ice cream is made, why bread rises, how to churn butter and where yogurt comes from. Measure and mix ingredients to get the right combination for some cool colloidal chemistry, conduct explosive experiments, and explore rockin' reactions as you learn to control the amazing power of chemistry! Take home recipes included so that you can use your science lab (kitchen) at home!

Camp Selections

Dino Dig—1/2-4
Even extinction hasn't extinguished our curiosity for the prehistoric beasts—we still dig those dinos! Discover the days of the dinos and dig right in to discover relics of the past as you uncover a wealth of information that other civilizations have left behind. Try your hand at an excavation as you master the skills of an archaeologist, anthropologist, and even a paleontologist. Many of the tools and techniques used to uncover human leftovers help bring to life some of the prehistoric beasts that once ruled our planet. Use a keen eye and a mathematical method to find a few fossils, unearth ancestral treasures, and learn all about the many inhabitants that came before us!

Fantastic Flyers - 2/20-21
It's a bird…It's a plane! Take flight in a paper airplane contest, play a little Bernoulli ball, design and fly your own custom kite! Explore the scientific principles of flight and rocketry as you use creative techniques to construct and launch mini rockets!

Treasure Hunters - 3/9-16
Treasure is a word that stirs the imagination of everyone of every age. What is treasure? Who hunts for treasure? Why do they hunt for treasure? How do people hunt for treasure? Explore these questions and take part in placing a treasure and recovering one as well. Learn treasure hunting from past to present and explore the modern day hunting technique of Geocaching. Come join us on a treasure adventure.

Super Hero Science - 4/6 & 4/9
Super heroes and science unite at the Imaginarium! Catch onto superhero secrets as you try your hand at the tricks of the trade! Craft air-powered hovercrafts that scoot faster than a speeding bullet, mix up a fresh batch of radioactive slime, and master the forces of magnetism a la Magneto Man all in a single afternoon!

Science of Color - 5/25
What happens when you mix red and blue? It's all about color as you experiment with the visual perception of light! You'll have a colorful experience as you take over the wheel to mix and blend your own palate. Shed some light on the science of the spectrum as you create your own artistic masterpieces to take home!

Your Camp Experience

All camp sessions include fun and educational hands-on activities, games, crafts, special guests, and exhibit exploration! Innovative curriculum integrating science, the arts, and humanities, inspires the imagination and encourages an overall love of learning!

Each Camp Session includes the following:

*** Discovery in the Exhibit Halls**

30-45 minutes each morning and afternoon Campers explore the exhibit areas Hands-On Hall, Sporty Science Arena, Mind Magic, Animal Lab, SEA-to-SEE Touch Tank & Aquaria, Dino Discovery, IMAG-TV Weather Station

*** Science, Humanities, & Arts Activities**
3-5 themed activities per day
Campers are led on a path of discovery by State of Florida Certified Teachers and Professional Museum Educators

*** Outdoor Exploration**
30 minutes per day (weather dependant)
Campers enjoy outdoor and free-time activities

*** "Hands-On Fun Show"**
20-30 minutes once per week
Campers participate in the Hands-On Fun Show and touch live animals

*** Tour of Outdoor Exhibits**
20-30 minutes once per week
Campers feed the fish at Fish-Eye Lagoon

*** 3-D Movie** Viewed once per week

*** Museum Store offers fun and educational items** - send $ for students to visit the store on Friday morning *(optional)*

*** DVD & Photo Slideshow** starring your camper is available for purchase each week of summer camp
